PROFESSIONAL SUMMARY

Analytics Engineer with experience building end-to-end data pipelines and analytics platforms using modern data stack tools. Skilled in ELT pipeline development, data modeling (fact & dimension design), and transforming raw data into scalable, analytics-ready datasets.

Experienced in working with cloud data platforms and relational databases, optimizing performance through partitioning, indexing, and query tuning. Strong focus on data quality, reproducibility, and delivering reliable datasets that power business intelligence and decision-making.

TECHNICAL SKILLS

Data Engineering & Analytics: ELT Pipelines, Data Transformation, Data Modeling (Star Schema, Fact & Dimension Design), Analytics Engineering, Data Quality & Validation, Analytics Data Marts

Databases & SQL: PostgreSQL, BigQuery, MySQL, SQL Server, Advanced SQL, Query Optimization, EXPLAIN ANALYZE, CTEs, Window Functions

Cloud, Performance & Tools: BigQuery, dbt, Data Pipeline Architecture, API Data Ingestion, Apache Airflow, AWS (S3, Redshift, Lambda, EC2), Partitioning, Indexing Strategies, Query Tuning, RBAC, Row-Level Security (RLS), Power BI, Python, Excel

WORK EXPERIENCE

Analytics Engineer

Nobby Media (Jul 2025 - Present)

- Designed and maintained end-to-end data pipelines, transforming raw operational data into clean, structured, and analytics-ready datasets for reporting and business intelligence
- Implemented staging-to-core data architectures, applying data cleaning, standardization, and deduplication to establish consistent data grain
- Modeled analytical datasets using fact and dimension tables to support scalable reporting and downstream analytics use cases
- Developed ELT workflows to ingest, transform, and curate large-scale transactional data (10M+ records) into optimized warehouse structures
- Optimized query performance using EXPLAIN ANALYZE, reducing execution time from seconds to milliseconds through indexing and query refactoring
- Applied partitioning and indexing strategies to large tables, improving query efficiency and reducing data scan overhead

- Implemented data quality validation checks, including deduplication logic, null handling, and consistency checks to ensure reliability of analytical outputs
- Designed and enforced secure data access using role-based access control (RBAC) and row-level security (RLS) for sensitive financial datasets
- Improved database architecture by resolving legacy issues, including missing indexes, inefficient transformations, and unstructured data workflows
- Collaborated with business and analytics stakeholders to deliver trusted datasets and dashboards supporting operational and financial decision-making

Data Analyst

Explicable Network (Oct 2022 - Jun 2025)

- Analyzed and transformed data from relational databases, spreadsheets, and APIs to support operational and strategic decision-making.
- Designed and optimized SQL queries to surface trends, anomalies, and actionable insights from complex datasets.
- Built and maintained executive-level Power BI dashboards and KPI reports used by leadership for performance tracking.
- Automated recurring analytics workflows and collaborated with cross-functional teams to deliver reliable, SQL-driven analytical solutions.

Customer Service Officer

Trustfund Pensions Ltd (Mar 2020 - Oct 2022)

- Provided accurate and timely support to customers while maintaining structured records and documentation.
- Collaborated with internal teams to resolve complex issues and support operational processes

EDUCATION

Bachelor of Science (B.Sc.) in Accounting

Ladoke Akintola University of Technology, Ogbomosho, Nigeria (2013 - 2019)

CERTIFICATIONS

Relational Database Design - University of Colorado Boulder

SQL for Data Science - University of California, Davis

LANGUAGES

English (Fluent)
